GovQA/OpenCities/Other Data Metered Products. Certain Granicus Products like GovQA and OpenCities provide a specific allotment of data storage as part of the annual subscription, as set forth on the Order or Quote document. Should data usage exceed the allotment purchased during the designated term, Client will be responsible for the fees associated with any data overage at the same price per unit as the initial data allotment. Data allotments reset at the commencement of each annual subscription term, and unused data cannot roll-over into subsequent subscription periods.
